

CashPilot

AI revenue and cash-flow agent for Xero-powered small businesses.

What should I do today to grow revenue and avoid a cash crunch?

CashPilot reads Xero data, forecasts the next 30-90 days, detects revenue leaks, maps messy external sales records, and queues owner-approved actions.

Forecast

Baseline breach on 18 Jul. After actions: no breach.

Revenue

GBP 25,460 revenue upside from Xero-backed opportunities.

Approval

18 actions across cash, growth, productivity, and integrations.

Small Business Pain

Owners do not need another chart. They need the next best action.

Pain 1

Closed-won work is not always invoiced quickly.

Pain 2

Cash can look fine until one bill and one late payer collide.

Pain 3

Integrations break when company names and fields are messy.

AGENTS SDK ORCHESTRATION

Specialists ready

Productivity Automation Agent

Handles messy receipts, reconciliation, duplicate bills, and contractor payment prep.

Adaptive Integration Agent

Maps CRM, e-commerce, payments, SaaS, and spreadsheet data into Xero objects.

Data Quality Agent

Checks whether Xero data is complete enough for forecasting.

Forecast Agent

Interprets deterministic risk windows and Monte Carlo output.

Cash Action Agent

Ranks customer and supplier interventions by forecast impact.

Collections Agent

Drafts customer-specific invoice follow-up messages.

Revenue Growth Agent

Finds dormant customers, upsells, subscription conversions, and service opportunities.

Outreach Agent

Turns revenue opportunities into customer-specific messages.

Supplier Payment Agent

Suggests which bills are safe to delay with human approval.

CFO Narrative Agent

Explains the forecast in plain English.

Vibe Integrator: Smart Mapping

CashPilot handles messy CRM/e-commerce records before they become missed revenue.

ConfidenceHigh

Forecast Intelligence

The app explains why cash changes, not only where the line goes.

Monte Carlo in plain English: CashPilot simulates many realistic payment-timing futures. The crunch probability is how often cash falls below the safe line.

Main Risk

Supplier payment timing creates the cash pressure.

Control Lever

Revenue opportunity pipeline is the strongest controllable lift.

Human Approval And Audit

Proactive does not mean reckless.

Approval Queue

Owner reviews tone, timing, tax/VAT details, and commercial context.

Traceability

Audit entries keep external and Xero source IDs together.

Safe Writeback

Draft invoices and contact notes are future write actions after approval.

I have prepared the draft invoice for review and can adjust the details before it is sent.	working with you on the last project. We spotted a few quick wins that could build on that work and would be happy to share a short plan this week.	regular rhythm. Would a fixed monthly retainer make planning and approvals easier on your side?
Brightside Studios INV-4018 Hi Brightside Studios, I hope you are well. We are offering a 2% early-payment discount on INV-4018 if payment can be made this week. Would that be helpful on your side?	Acme Retail Group INV-4012 Hi Acme Retail Group, I hope you are well. A quick reminder that INV-4012 for £4,200 is now due. Could you let us know when payment is scheduled?	PrintCo Supplies BILL-188 Hi PrintCo Supplies, we are reviewing payment timing for BILL-188. Would it be possible to move payment to 2026-07-25? We value the relationship and want to confirm this works for your team.

Bounty Fit And Close

CashPilot combines data analysis and autonomous action with Xero at the centre.

Revenue Growth

Predict late payments, detect missed invoices, find upsells and subscriptions.

Productivity

Automate receipts, reconciliation, duplicate bills, and contractor payment prep.

Vibe Integrator

Adaptively map messy CRM, e-commerce, SaaS, and spreadsheet data into Xero.

Closing line: CashPilot turns Xero from a record of what happened into an approved action plan for what should happen next.

Demo checklist: show baseline breach, Brightside mapping, missing invoice recommendation, cash risk fan chart, Xero API footprint, approval queue, and audit log.
